Award Winning Anti Virus Software from Germany

G DATA AntiVirusKit did it again and won several tests in Germany, the home of AntiVirusKit. AntiVirusKit (AVK) 2004 has won more awards in a 15 month period than any other anti-virus program.

GDATA AntiVirusKit (AVK®) provides highest protection against Computer Viruses with the Award Winning Double Scan Technology. In larger organizations

the use of two scan engines is a common and proven concept. Now you can employ Enterprise security level in your PC.

AVK is in top 10 of the most sold Software in Germany (non Games).

GFK Marketing Service Germany, collected data from over 1000 software distributors, shopping malls, and electronic shops. The result of the review shows the following sales ranking:

1. ANTIVIRUS KIT INTERNET SECURITY 2005
2. ANTIVIRUSKIT 2005 PROFESSIONAL

Virus Bulletin VB 100% Award

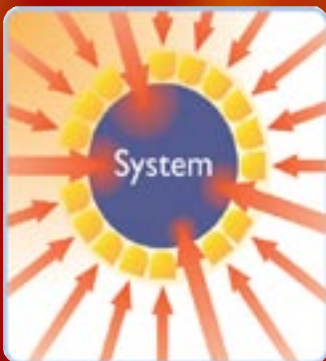

June 2005. GData AntiVirusKit passes once more the VB100% test. Gdata AntiVirusKit is now five times in a row "100% Virus Bulletin" awarded

Why two scan engines?

One scan engine alone can't deliver 100% protection against viruses. Infection of the system can occur due to unknown virus patterns and omitted file formats. Under ideal circumstances two scan engines will complement each other to deliver 100% virus protection.

In larger organizations the use of two scan engines is a common and proven concept. Now you can employ Enterprise security level in your PC. Nearly all tests from reputable magazines were won by AntiVirusKit professional 2004.

One scan engine alone can still lead to infection

Only the Double Scan Technology offers an optimal protection due to its "second line of defense".

AntiVirusKit InternetSecurity 2005:

- Antivirus (uses the same award winning anti-virus system as AntiVirusKit 2005 professional)
- Firewall
- Anti-dialler
- Anti-spam
- Anti-phishing
- Track eraser
- Banner ad blocker
- Popup killer

AntiVirusKit 2005 Professional

New Features in AntiVirusKit 2005:

- Even more efficient virus detection
- Faster, more frequent virus updates
- New anti-dialler module blocks diallers and other riskware
- Thorough cleaning of infected computers
- AVK SecurityAgent immediately informs you of new AVK updates, new virus outbreaks, security bulletins, etc.
- Extended AVK boot scan (new signatures loaded under Linux, disinfection of FAT and NTFS partitions etc.)
- Password protection for all AVK settings
- Extensive virus encyclopedia
- Virus scan the first time you start AVK

System requirements:

256 MB RAM, XP, 2000, 2003 CD-ROM, VGA graphics card. An Internet connection is required for online updates.
